

# **FASTER Inspector**

powered by TransitCheck

INTEGRATED FLEET MANAGEMENT

**FASTER** Inspector powered by TransitCheck is an integrated system for vehicle fleets that require pre-trip, post-trip, driver swap, maintenance, and safety inspections. The system manages inspections, basic maintenance, reports, and other optional features including vehicle location, driver management, and automation of paper forms such as incident reports. Inspections can be fully customized by the customer via an easy to use portal at any time at no additional cost, and there can be an unlimited number of inspection types per vehicle.

# **FEATURES**

# Inspections

Inspections are completed by a driver following an easy to follow template. Virtually no training is required to use the TransitCheck App. Pictures and comments for warned or failed items are instantly noted for follow up.

#### **Low Cost**

At about \$0.50 a day per vehicle, less than the cost of paper forms, digital inspection data is instantly available for maintenance, action, auditing and measuring results. Month to month, annual or multi-year terms are available.

# **Inspection Assurance**

**FASTER** Inspector powered by TransitCheck uses GPS to track the driver walking around the vehicle and record the time when each item is inspected. The results will stand up to auditor scrutiny. No hardware has to be attached to the vehicle.

# **Android Tablet**

The TransitCheck App runs on Android tablets. Customers can provide their own tablets or source qualified tablets from us. A single tablet can inspect your whole fleet, no need to be paired to a single vehicle or driver.

# **Inspection Data**

Unlike other systems, with **FASTER** Inspector powered by TransitCheck you own your inspection data and have direct access to retrieve all your data for your own analytic purposes at no additional cost. Standard reports are built in and can be customized.

# Customizable

We can set up your inspections for you, or you can make changes yourself in real time, at no additional cost. Changes to drivers, vehicles or templates made on the portal sync to the tablets in minutes.

ACTIN

# **Easy To Use**

Download TransitCheck App from the Google Play Store, and you are in business. The interface is so simple it needs almost no training to use – saving you time and money. You can customize it to fit your needs without having to pay for an update.

# Web Portal

**FASTER** Inspector powered by TransitCheck is globally hosted in Amazon, the most secure, fastest and reliable "cloud" computing service. The web portal is accessible at any time through common web browsers by authorized users anywhere in the world.
