

FASTER Forms

powered by **TransitCheck**

TURN PAPER INTO DATA

***FASTER** Forms powered by TransitCheck is an optional addition to FASTER Inspector which allows Operators to automate a form which a driver now completes on paper, into an electronic organized, supported process on their tablet. This can include any form from something as important as an accident report to something as simple as a time off request -- if drivers complete it now on paper, it can be automated. Forms can be set so that when they are completed by a driver, a notification of the form is automatically emailed or texted to the proper staff. The system automatically captures the date, time, and location the form is completed and can have mandatory fields. Unlike paper forms, electronic forms can be updated quickly by the user and the updated forms pushed out to devices instantly. The electronic forms also allow for unlimited expandability, for instance where the number of "involved parties" can vary from one, to any number. The forms support data input via pictures and video, plus tools such as text to speech make it simple for drivers to input data without time consuming typing.*

FEATURES

Digitization and Storage

The TransitForms application collects the data, paper and its storage is eliminated. A digital record is stored in the cloud for reference or audit - never to be lost.

Capture Essential Data

The customer defines specific data that must be entered such as the weather, pictures of vehicles, drivers, witnesses and the scene.

Paper Replacement

No need for companies to fill out or distribute paper forms. Digitization facilitates easy changes, future reference and automatic archiving.

Input data Flexibility

TransitForms supports data collection in multiple ways including: text, voice to text, pictures and video

WEATHER INFORMATION	
WEATHER CONDITIONS	<input type="checkbox"/> CLEAR <input checked="" type="checkbox"/> CLOUDY <input type="checkbox"/> RAINY <input type="checkbox"/> WINDY

Real Time Data Capture

TransitForms captures essential data when critical information is readily available... at the scene of an accident just after it occurs.

Flexible Application

TransitForms digitizes any paper form - incident reporting, customer complaint, time off request.

Company Control

The system allows customer administrators to create and/or modify their own forms at will without involving the vendor, and at no additional cost.

Immediate Notifications

As soon as a Form is completed, the system will route it automatically to where it has to go (manager, HR), and store a copy.
